

# LEAF AREA METER

## DESCRIPTION

Leaf area meter is a portable measuring instrument and easy-to-use, it can work in field or outdoor practices. This instrument measures leaf area and related parameters of accurately, quickly and without damage. It is widely used in agriculture, meteorology, forestry, and other departments.

## TECHNICAL PARAMETERS

MODEL	ECO-YMJ
Test unit	Millimeter (mm), square centimeter (mm <sup>2</sup> )
Accuracy	±2%
Resolution	1 mm <sup>2</sup>
Measurement length	≤ 1000 mm
Measurement width	≤ 160 mm
Thickness	≤ 8 mm
Data storage	200 groups
Display	LCD display
Size	Approx. 70 x 50 x 320 mm
Gross weight	Approx. 1.2 kg (with carrying case)
Power requirements	Four 1.5V alkaline batteries

Ecoshel reserves all the rights to changes in product design, if there are any design change, we will not inform in advance.

## ***STANDARD ACCESSORIES***

1. Carrying case
2. Data-line

## ***KEY FEATURES***

1. Automatic calibration function.
2. Measurements can be observed (prior saved) and deleted.
3. Function of measurement length and width leaves.
4. Great data storage.
