

Model DC103

The product will show the current temperature and humidity in the room, as well as the external temperature thanks to a weather resistant probe. An ideal device for use at home, in the car and in various places. The probe can be placed anywhere: aquarium, fridge, freezer, greenhouse or in vans.

In addition, the device displays the lowest and highest values recorded during the day.

It has a large, easy-to-read LCD display, from which we can easily read the indicators of interest.

A smiley face is displayed on the screen to indicate whether the temperature is comfortable.

TECHNICAL SPECIFICATIONS:

- ✓ **Product code: 01763**
- ✓ **Made of high quality materials**
- ✓ **Large LCD display**
- ✓ **Modern design**
- ✓ **Graphical indication of temperature comfort**
- ✓ **Display of minimum and maximum temperature**
